GOVERNMENTS DIVISION

Curtis T. Hill, Chief

ACKNOWLEDGMENTS. This report was prepared in the Governments Division by the Employment Branch, headed by **Alan V. Stevens,** under the direction of **Kenneth E. Anderson,** Assistant Division Chief for Special Government Statistics. The data for local governments were assembled primarily by the Special Support Staff under the direction of **John Coleman,** Assistant Division Chief for Survey Operations.

Data processing was directed by **Sherman Landau,** Assistant Division Chief for Research and Methodology. Computer operations were programmed by **Judith Jennings** and were carried out by the Computer Services Division.

The Publications Services Division, Social and Economic Statistics Administration, provided advice and service in the preparation of copy for publication. Publication copy was prepared in the Governments Division, supervised by **Helen D. Files.**

Grateful acknowledgment is made of the cooperation of thousands of local government officials who provided information and other assistance for preparation of this report.

2. Local Government Employment and Payrolls in the 72 Largest SMSA's and Their Component County Areas, by Function: October 1972. 6

3. Local Government Employment Per 10,000 Population in the 72 Largest SMSA's and Their Component County Areas, by Function: October 1972 39

4. Employment and Payrolls of Selected Local Governments in the 72 Largest SMSA's, by Function: October 1972. 56

5. Employment and Payrolls of Local Governments in County Areas of 200,000 Population or More Outside the 72 Largest SMSA's, by Function: October 1972 89

6. Local Government Employment Per 10,000 Population in County Areas of 200,000 Population or More Outside the 72 Largest SMSA's, by Function: October 1972 96

INTRODUCTION

In October 1972, local governments in the 72 largest standard metropolitan statistical areas (SMSA's) employed 4.2 million persons, or 54 percent of all local government employees. Local governments in these 72 SMSA's had October 1972 payrolls of $3,177 million, or 63 percent of all local government payrolls. Approximately 107 million persons, or 53 percent of the population of the United States, resided within these 72 largest SMSA's in 1970.[1]

Significant increases in local government employment and payrolls within these 72 SMSA's since 1970 are indicated by the following figures:

Local governments in 72 largest SMSA's	October 1972	October 1971	October 1970
Employment (thousands).....	4,210	4,058	3,933
Payrolls (thousands of dollars)	3,176,955	2,878,920	2,661,651

These increases generally parallel nationwide trends in the employment and payrolls of all local governments summarized in the Bureau of the Census report Public Employment in 1972.

Slightly more than one-sixth of all persons counted as paid employees within these 72 largest SMSA's were employed on a part-time basis. When the number of these employees is discounted by applying average full-time earning rates, the full-time equivalent employment in October 1972 was 3.7 million.[2]

[1]The areas of the 72 SMSA's included in this report were the most populous metropolitan areas based on the 1970 Census of Population. For this report, these areas are covered in terms of their respective boundaries utilizing the definition employed by the U.S. Office of Management and Budget in October 1972.

[2]Full-time equivalent employment is a computed statistic representing the number of full-time employees that could have been employed if all personnel were engaged on a full-time basis at the average monthly pay applying to full-time workers. It is calculated, for a particular function of a government, by dividing the average monthly pay for full-time employees of that function into the total pay for all full- and part-time employees in the function.

The 1972 Census of Governments shows that these 72 SMSA's contained more than 12,900 local governments, or 16.5 percent of all local governments in the United States. The number of local governments per SMSA ranged from four local governments in the Honolulu, Hawaii SMSA to 1,172 local governments in the Chicago, Ill. SMSA. Table C on page 4 provides a convenient summary listing of the 72 SMSA's covered in this report and shows the 1970 population and number of local governments within each SMSA.

DISTRIBUTION BY FUNCTION

Nearly 51 percent of the October 1972 full-time equivalent employment in the 72 largest SMSA's, about 1.9 million, was in the education function. Table A presents a summary of the functional distribution of local government employment within the 72 SMSA's as of October 1972.

Table A. **Local Government Employment in the 72 Largest SMSA's by Function**

Function	Local government employment (full-time equivalent)	
	Number (thousands)	Percent
Total.....	3,657	100.0
Education.....	1,855	50.7
Police protection.....	275	7.5
Hospitals.....	225	6.2
General control.....	129	3.5
Fire protection.....	125	3.4
Local utilities other than water supply[1].....	125	3.4
Public welfare.....	115	3.2
Highways.....	114	3.1
Parks and recreation.....	88	2.4
Sanitation other than sewerage.....	75	2.0
Water supply.....	63	1.7
Financial administration....	63	1.7
Health.....	56	1.5
Housing and urban renewal...	48	1.3
Correction.....	46	1.2
Sewerage.....	41	1.1
Libraries.....	38	1.0
All other functions.....	176	5.1

[1]Electric power, transit, and gas supply systems.

About 68 percent of local government education employees within the 72 largest SMSA's, as shown in table 1, are classified as teachers. School systems canvassed were asked to include under this heading not only teachers but also principals, supervisors of instruction, school librarians, and guidance personnel. Other employees of public schools include administrative and clerical personnel, plant operation and maintenance employees, and any bus drivers, lunchroom, health, and recreational personnel.

General control is comprised of the legislative bodies, courts, and the chief executives and central staff agencies of governments. The police and fire protection categories include not only uniformed forces but also administrative and clerical employees concerned with these services. Sanitation other than sewerage refers to street cleaning and to refuse collection and disposal.

The nature of governmental activities comprising other functional classes is generally evident from their designation.

Table B presents a comparison of the functional distribution of full-time equivalent employment per 10,000 population for local governments within the 72 largest SMSA's and for all other local governments in the United States.

Table B. **Comparison of Local Government Employment Inside and Outside the 72 Largest SMSA's**

Function	Full-time equivalent employment per 10,000 population	
	Inside 72 SMSA's	Outside 72 SMSA's
Total	342.8	315.8
Education	173.9	194.1
Highways	10.7	17.3
Public welfare	10.8	5.5
Hospitals	21.1	20.3
Health	5.3	2.9
Police protection	25.8	15.4
Fire protection	11.7	8.0
Sewerage	3.8	2.6
Sanitation other than sewerage	7.0	4.6
Parks and recreation	8.3	3.9
Housing and urban renewal	4.5	1.4
Correction	4.3	1.3
Libraries	3.5	2.2
Financial administration	5.9	6.5
General control	12.1	10.7
Water supply	5.9	4.7
Local utilities other than water supply[1]	11.7	3.8
All other functions	16.4	10.7

[1]Electric power, transit, and gas supply systems.

As is shown in table B, local governments within the 72 largest metropolitan areas have a greater number of employees in relation to the population served, 342.8 per 10,000 population, than do local governments outside these metropolitan areas, 315.8 per 10,000 population. This is partly due to the fact that local governments in large urban areas frequently provide services, such as airports, port or terminal facilities, and utilities, that are often privately owned or unavailable in other areas. Also, the ratios of other services such as police and fire protection, sanitation, and health are influenced by increased population density.

DATA FOR COUNTY AREAS AND MAJOR LOCAL GOVERNMENTS

Table 2 presents local government employment and payroll statistics for each of the 72 largest SMSA's and their component county areas. Table 3 presents figures on the number of local government employees per 10,000 population within these SMSA's and their component county areas.[3]

Statistics on the employment and payrolls of major individual local governments within each of the 72 SMSA's appear in table 4. These individual units include the central counties and central cities as well as other selected local governments which accounted for a significant portion of the local government employment and expenditures within the SMSA.[4]

In interpreting tables 2 and 3, it is important to note that the data presented are county area data and are not employment and payroll data for individual county governments. There is considerable interstate diversity in the role of the various types of local governments and in arrangements for the administration and provision of particular governmental services. For example, in some States local education is provided by dependent agencies of counties or municipalities, whereas, in other States, local education is provided by independent school

[3]Standard metropolitan statistical areas in New England are defined in terms of city and town boundaries rather than consisting of entire counties as is the case for such areas in other parts of the country. Accordingly, for this report, statistics were developed instead for certain groups of entire counties that make up Connecticut State Economic Area C, Massachusetts State Economic Areas A and C, and Rhode Island State Economic Area A.

[4]Counties in the four New England SMSA's are excluded since they either have no government operation or their government operations are of relatively small magnitude.

districts. Likewise, responsibility for the provision of hospital and local utility services may be assigned to municipalities in some States and to special district governments in other States. In order to minimize this diversity, it is advantageous to present local government statistical data on a county area basis rather than by type of local government. [5]

MAJOR COUNTY AREAS OUTSIDE THE 72 SELECTED SMSA'S

Table 5 presents statistics on local government employment and payrolls in October 1972 for 61 large county areas which were outside of the 72 largest SMSA's.[6] Table 6 presents statistics on the number of local government employees per 10,000 population in each of these 61 county areas.

As with tables 2 and 3, it should be noted that the statistics apply to the aggregate of local governments in the county area and do not apply to the individual county government.

INTERAREA COMPARISONS

Explicit interarea comparisons based upon the data contained in this publication must be made with care. Two limiting factors especially need to be noted: (1) As more fully explained under Sources and Reliability of Data, the statistics shown are estimates subject to sampling variations; and (2) there are considerable interstate differences in the role of local governments relative to State governments in arrangements for the administration and provision of particular governmental services. Variations of this nature are especially significant with regard to public welfare, highways, health, hospitals, and education.

SOURCES AND RELIABILITY OF DATA

Data in this report represent estimates based on information collected by mail questionnaire from a survey panel of local government units. The survey panel for this report consisted of all major local governments in the 72 largest SMSA's and a random sample of the remaining local governments in the SMSA's. In selecting the sample units for the survey panel, the remaining local governments in the 72 SMSA's were stratified by component county areas and by type of local government within each county area (i.e., municipalities, townships, school districts, and special districts) and within each type by the magnitude of their annual expenditures as reported in the 1967 Census of Governments.

The statistics which are based wholly or partly on sample data are subject to sampling variation and may differ slightly from the results obtainable from a complete canvass of all governmental units.

For this annual survey, employment and payroll figures reported by local government officials were generally accepted as being substantially correct. In some cases, varying interpretations of the instructions or deficiencies in governmental records of employment may have made it difficult for officials to render complete and comparable reports for their government. These difficulties were dealt with by (1) careful definition of terms and detailed instructions in difficult cases, (2) supplementary correspondence with officials concerned, and (3) intensive examination of data collected--i.e., verification of internal consistency, and comparison with previous reports and other sources of data.

This report is one of three recurrent annual publications based on a survey of government employment covering October 1972. One companion report, Public Employment in 1972, presents State-by-State data for all types of local governments, as well as for State governments and the Federal Government. A second companion report is City Employment in 1972, which shows employment and payroll figures individually for the 385 cities and 20 major urban townships that had 50,000 population or more in 1970.

Final reports of the 1967 Census of Governments, particularly volume 3, number 2, Compendium of Public Employment, provide national and State-by-State figures on public employment and payrolls in October 1967, together with additional geographic detail based upon a canvass of all local governments.

---

[5] Additional background for the consideration of such differences in the relative roles of local governments is available in the 1967 Census of Governments, volume 5: Local Government in Metropolitan Areas. Table 5 of that report reflects a number of significant differences between SMSA's and other areas, while table 8 presents data on local government employment and payrolls, by function, in each of the 227 SMSA's and their component counties as defined in 1960 by the U.S. Office of Management and Budget, formerly the U.S. Bureau of the Budget.

[6] The 61 county areas included in this report consist of all counties outside the 72 SMSA's shown which, at the time of selection, had July 1, 1966 population estimates of 200,000 population or more. Population figures now available from the 1970 Census of Population are shown for each county area in tables 5 and 6.

Note: Because of rounding, detail may not add to totals.

- Represents zero or rounds to zero.

Z Less than half the unit of measurement shown.

[1]Selected items have been adjusted to shift an estimated portion of the employment and payroll amounts for large multicounty governments from the "primary" county area to other county areas involved. This adjustment applied to certain portions of the following SMSA's: Denver, Colo.; Washington, D.C.-Md.-Va.; Atlanta, Ga.; Kansas City, Mo.-Kans.; and Omaha, Nebr.-Iowa. See footnote 1 at end of table 3 for further detail.

Note: Because of rounding, detail may not add to totals.

- Represents zero or rounds to zero.

Z Less than half of the unit of measurement shown.

[1]Selected items have been adjusted to shift an estimated portion of the employment and payroll amounts for large multicounty governments from the primary county area to other county areas involved. This adjustment applied to the following areas:

Denver SMSA: Arapahoe and Adams Counties--data for Aurora city and Adams-Arapahoe School District 28J.

Washington, D.C. SMSA: Montgomery and Prince Georges Counties, Md.--data for Washington Suburban Sanitary Commission.

Atlanta SMSA: De Kalb and Fulton Counties--data for Atlanta city, Atlanta Independent School District, and Fulton-De Kalb Hospital Authority.

Kansas City SMSA: Clay and Jackson Counties, Mo.--data for Kansas City.

Omaha SMSA: Douglas and Sarpy Counties--data for Omaha City School District Number 1.

Note: Because of rounding, detail may not add to totals.

- Represents zero or rounds to zero. [r]Revised. Z Less than half the unit of measurement shown. [1]Includes data for degree-granting college or university operated by local government. [2]Data are for city and county consolidated government. [3]Data are for October 1970. [4]Education data are for October 1971. [5]Data, except for education, are for October 1971. [6]Because of Census Bureau classification procedures, the employees providing police protection for the Port of New York Authority have been prorated among the functions shown. However, for purposes other than this report, it is possible to identify the October 1972 police protection employment and payroll: Full-time equivalent employment, 1,233; payroll, $1,318,000. [7]The Cleveland Public Library is considered for Census purposes as a dependent agency of the Cleveland City School District. Therefore, data for the Cleveland Public Library have been included here. [8]Data are for October 1971.
